

## BUSINESS LAW

Planning, structuring and formalization of international investments by individuals and companies in Brazil.

We advise foreign clients and their local investees in all aspects of foreign investment in Brazil, covering all stages of investment, from the constitution of the national vehicle to compliance with exchange rules applicable to foreign investments and capital repatriations. In conjunction with other areas of the firm, we assist external investors as they establish their operations in Brazil and face legal needs related to office rental, hiring employees, registering trademarks and complying with tax and social security regulations.
